

Product Bulletin

Film Capacitors Production Flexibility

ID Number/Date	ID Number (MMDDYY): CCN-071323-KB
Affected Products	Film THT capacitors (legacy products)
Update Details	Production flexibility for affected products by KEMET plants. KEMET had ability to ship equivalent products from any internally qualified KEMET location and continue to apply this strategy in future.
Justification and Benefits	This capability not only provides multiple manufacturing sites, but allows KEMET additional shipping flexibility. This enhances our ability to react to Customers' urgent needs in emergency situations and provides the potential for commitment to shorter lead times in general. This is achieved without impact to product form, fit, or function as the products are equivalent with respect to physical, mechanical, quality and reliability characteristics. Each qualified location utilizes common manufacturing processes, complies with standardized control techniques, and meets stringent qualification testing to guarantee product performance. This allows KEMET to focus on best practices, bringing to market products resulting from the most technically advanced processes possible.
Effective Date	KEMET continue to implement this flexible supply approach in order to better satisfy the customers. All products, regardless of location of manufacture are identified with a KEMET customer label indicating the KEMET logo, customer part number, and KEMET equivalent part number. Manufacturing plants can be recognized by label as COO.
