

RoHS Compliant

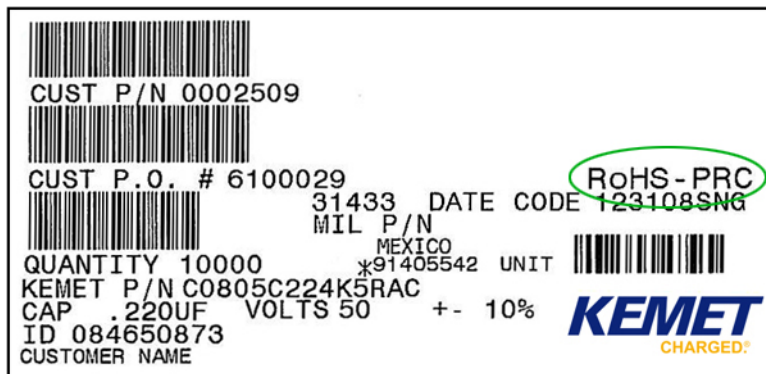

KEMET Environmental EZ ID Product Labeling

In 2005 KEMET responded to the needs of our customer base by providing RoHS compliance status on the lowest level package labels. Our approach was to provide a simple and easy method for compliance identification.

- RoHS – YES Product is Compliant to EU Directive 2002/95/EC
- RoHS – NO Product is Not Compliant to EU Directive 2002/95/EC

In 2007 customers requested compliance status to China RoHS. KEMET heard the needs of our customers and responded with a revised EZ ID labeling method.

- RoHS – PRC Product is Compliant to EU Directive 2002/95/ECs and Peoples Republic of China RoHS.
- RoHS – EU Product is Compliant to EU Directive 2002/95/EC
- RoHS – NO Product is Not Compliant to EU Directive 2002/95/EC

RoHS – PRC example label: Product is both RoHS EU and Peoples Republic of China compliant. Product does not contain lead, hexavalent chromium, mercury, cadmium, PBB, PBDE and does not rely on any exemption for compliance.
