

# **KEMET Corporation**

#### **CONFLICT MINERALS REPORT**

for the reporting period from January 1 to December 31, 2023 ("Report")

Report Release Date: May 29, 2024

#### INTRODUCTION

KEMET Corporation is a leading global manufacturer of electronic components. As used in this Report, the terms "we," "us," "our," "KEMET" and the "Company" refer to KEMET Corporation, unless the context indicates otherwise. This Report is applicable to KEMET's electrical filters and polymer, tantalum, ceramic, film, aluminum-electrolytic, and electric double-layered capacitors.

On June 15, 2020, YAGEO Corporation ("YAGEO") completed its acquisition of KEMET by acquiring all KEMET's outstanding shares of common stock, with KEMET surviving as a wholly owned subsidiary of YAGEO. As a result of the merger, KEMET is no longer a publicly traded company and will no longer file a Specialized Disclosure with the U.S. Securities and Exchange Commission ("U.S. SEC"). KEMET is continuing to voluntarily publish this Report to publicly and transparently disclose its supply chain due diligence. YAGEO remains the ultimate parent company, while KEMET will continue as a brand under an umbrella referred to as YAGEO Group.

This Report is developed to be conformant with section 1502 "Conflict Minerals" of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank") due diligence requirements and published in accordance with the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chain of Minerals from Conflict-Affected and High-Risk Areas ("OECD Guidance").

For the reporting period from January 1 to December 31, 2023 ("Reporting Period"), KEMET conducted due diligence on the source and chain of custody of the cassiterite, columbite-tantalite, wolframite, and gold, or their derivatives tin, tantalum, and tungsten ("conflict minerals"), that were necessary to the functionality or production of the products ("necessary conflict minerals") that we manufactured or contracted to manufacture on or after January 1, 2023 to ascertain whether these conflict minerals originated in the Democratic Republic of Congo ("DRC") or an adjoining country as defined in Dodd-Frank ("Covered Countries") and directly or indirectly financed or benefited armed groups in any of these Covered Countries. It is noted that manufacturing products during a defined period of time may naturally include materials sourced prior to and during the Reporting Period.

The reasonable country of origin inquiry and due diligence measures were applied to identified conflict mineral suppliers prior to and during the Reporting Period. Some conflict minerals utilized during the period were considered "outside the supply chain" under Dodd-Frank, meaning materials that were smelted (with respect to tin, tantalum, or tungsten) or fully refined (with respect to gold) prior to January 31, 2013, or materials that have not been smelted or fully refined but were located outside of the Covered Countries prior to January 31, 2013. As such, conflict minerals that were considered "outside the supply chain" are exempt pursuant to Dodd-Frank. However, for the purpose of this Report, KEMET's due diligence measures did not exclude the presence of these materials.

Below is a summary chart illustrating each of our product categories and the conflict minerals that are necessary to their functionality or production.

Product Category	Tantalum	Tin	Tungsten	Gold
Tantalum Capacitors	<b>~</b>	0	×	0
Tantalum Polymer Capacitors	<b>~</b>	0	×	0
Aluminum Polymer Capacitors	×	0	×	0
Ceramic Capacitors	×	0	0	0
Film and Paper Capacitors	×	0	×	0
Aluminum Electrolytic Capacitors	×	0	×	0
Electric Double-Layered Capacitors	×	~	×	×
Electrical Filters	×	0	×	0

- ✓ Product category contains specified conflict minerals
- O Product category contains specified conflict minerals depending on specific part type
- × Product category does not contain specified conflict minerals

KEMET has concluded in good faith that during 2023:

- 1. KEMET manufactured or contracted to manufacture products as to which conflict minerals are necessary to the functionality or production;
- 2. Tantalum material was sourced either directly through our vertically integrated tantalum supply chain or through external third-party suppliers. All tungsten, tin, and gold materials were sourced from external third-party suppliers; and
- 3. Based on a reasonable country of origin inquiry, KEMET knew or had reason to believe that a portion of its necessary conflict minerals originated or may have originated in the Covered Countries and knew or had reason to believe that those necessary conflict minerals may not be from recycle or scrap sources.

The results of our reasonable country of origin inquiry conducted on these conflict minerals were as follows:

- For tin and gold, KEMET determined a portion of the material came from recycle or scrap material.
   Further, we determined the country of origin for recycle or scrap materials did not include the Covered Countries.
- For tantalum, we determined the country of origin for all materials and confirmed that the country of origin included the Covered Countries.
- For tin not from recycle or scrap, we determined the country of origin for all materials and confirmed that the country of origin included the Covered Countries.
- For gold not from recycle or scrap, we determined the country of origin for all materials and confirmed that the country of origin included the Covered Countries.

For tungsten, despite diligent efforts and because some tungsten necessary to the functionality
or production of KEMET's products was acquired in 2011 and considered to be "outside the supply
chain" (or fully smelted), we were not able to determine the country of origin for all materials but
did confirm a country of origin included the Covered Countries.

Conflict Mineral	Countries of origin include the Covered Countries?
Tantalum	Yes
Tin	Yes
Tungsten	Yes
Gold	Yes

#### **DUE DILIGENCE MEASURES**

# Design of Our Due Diligence Measures

Our conflict minerals due diligence measures have been designed to conform with the OECD Guidance, as applicable for tin, tantalum, tungsten, and gold in all material respects. KEMET is both an "upstream" and "downstream" company. KEMET took an early leadership position in the industry in support of the responsible sourcing of material from the DRC and was instrumental in the development of the Kisengo Foundation. We designed both our upstream and downstream due diligence measures to:

- Establish strong company management systems for conflict minerals supply chain due diligence and reporting compliance;
- 2. Identify and assess conflict minerals risks in our supply chain;
- 3. Design and implement strategies to respond to conflict minerals risks identified;
- 4. Contribute to independent third-party audits of the due diligence practices of conflict minerals smelters and refiners by participating in industry organizations;
- 5. Report on our conflict minerals supply chain due diligence activities, as recommended by the OECD Guidance; and
- 6. As an upstream company, implement policies and procedures to ensure KEMET's tantalum smelting operations in Mexico meets the due diligence requirements necessary to be conformant to the Responsible Minerals Initiative ("RMI") Responsible Minerals Assurance Process ("RMAP").

## Description of the Due Diligence Performed

Based on the OECD Guidance, "upstream" means the minerals supply chain from the ground to the smelters/refiners and "downstream" means the minerals supply chain from smelters/refiners to retailers. "Upstream companies" include miners, local traders/exporters from the country of mineral origin, international concentrate traders, minerals re-processors, and smelters/refiners. "Downstream companies" include metal traders and exchanges, component manufacturers, product manufacturers, original equipment manufacturers (OEMs), and retailers. Below, KEMET has described its upstream and downstream due diligence activities that are in accordance with the five steps set forth in the OECD Guidance. These activities were performed during the Reporting Period.

# Step 1: Establish strong company management systems.

- A) To clearly communicate to suppliers and the public, KEMET maintained a formal company policy, our "Supply Chain Policy," to avoid the use of conflict minerals which may directly or indirectly finance or benefit armed groups in the DRC or an adjoining country. The Supply Chain Policy is publicly available on our website (found here: <a href="https://www.kemet.com/en/us/about/sustainability.html">https://www.kemet.com/en/us/about/sustainability.html</a>) and is included in KEMET's purchase order terms and conditions (found here: <a href="https://www.kemet.com/en/us/supply-management.html">https://www.kemet.com/en/us/supply-management.html</a>). The Supply Chain Policy was communicated to conflict minerals raw material suppliers during the Reporting Period and to new raw material suppliers during our supplier "on boarding" process. The Supply Chain Policy applies to all KEMET's suppliers of conflict minerals raw materials.
- B) To structure internal management and support supply chain due diligence, KEMET maintained its internal procedures CPP-500: Conflict Minerals and CPP-500A: Supply Chain Policy which are conflict minerals documents formally stating that KEMET's Sustainability Council has oversight and ownership of the Supply Chain Policy. The Sustainability Council membership consists of a cross section of senior management led by Senior Vice President Quality, Procurement and Chief Compliance Officer. The Sustainability Council met quarterly to address current and future sustainability objectives and concerns, as well as supply chain and conflict minerals due diligence efforts.
- C) To establish a system of controls and transparency over the conflict minerals supply chain as a downstream company, KEMET followed our internal quality and compliance procedures requiring suppliers to provide information on the smelters or refiners in their supply chain utilizing the RMI Conflict Minerals Reporting Template ("CMRT"). Records of suppliers' responses were recorded and maintained. The RMAP conformance status of the smelters and refiners identified in supplier CMRTs was reviewed by KEMET to determine the responsible sourcing of material. RMAP conformance status was determined using the RMI's published Conformant Facilities Lists (formerly known as Conformant Smelters and Refiners List). The supplier information and data were also used to provide our customers with conflict minerals smelter or refiner information via the CMRT. As an upstream company, KEMET followed SQP-109: Tantalum Supply Chain Transparency Procedure ("SQP-109") which directs internal procedures for reviewing material source, country of origin, and chain of custody information. Suppliers to our upstream operations provided this information through quality assessments and supplier onboarding documentation. Additionally, we performed risk identification, management, and monitoring of our supply chain as described below in Step 2.
- D) To strengthen engagement with its suppliers, KEMET performed smelter outreach and participated in supply chain seminars and conferences. KEMET also participated in RMI conflict minerals discussion and work groups, including the Smelter Disposition Team, Due Diligence Practices Team, Minerals Reporting Templates Team, and others.
- E) KEMET had multiple communication channels available to serve as grievance mechanisms for early-warning risk awareness. Internally, KEMET provided an Ethics Hotline for its personnel to anonymously report possible violations of our Global Code of Conduct and other policies. This information was provided internally via KEMET's employee human resources platform and posted locally within KEMET facilities. The Ethics Hotline program was administered by a third-party firm which was not connected to KEMET. Externally, contact information for reporting possible violations was made available through KEMET's public website (found here: <a href="http://www.kemet.com">http://www.kemet.com</a>). KEMET also actively participated in the following industry or multi-stakeholder groups which served as an early-warning risk-awareness system.

Group	Participation Status
Organisation for Economic Co-Operation and Development (OECD)	Participant
Responsible Minerals Initiative (RMI)	Member
RMI Steering Committee	Joel Sherman Senior Director – Compliance & Sustainability (Served on RMI Steering Committee during 2023)
International Tin Research Institute Tin Supply Chain Initiative (iTSCi)	Member
Tantalum-Niobium International Study Center (TIC)	Member

## Step 2: Identify and assess risk in the supply chain.

- A) For the purpose of identifying risks, KEMET utilized the CMRT to obtain smelter or refiner information from suppliers of raw materials which contained a conflict mineral.
- B) To assess risk, KEMET reviewed the supplier CMRT responses for completeness and for reasonableness, including 1) a response does not contain contradictions or inconsistencies and/or 2) the response is consistent with KEMET's knowledge of the supplier's business. KEMET followed up with suppliers who were unresponsive or required additional clarification.
- C) As an upstream company, KEMET and its subsidiary, KEMET de Mexico, S.A. de C.V., ("KEMET Mexico") followed established internal procedures to identify and assess risk in the supply chain as described below.
  - SQP-101: Supplier Approval System ensured suppliers completed a formal approval process including Supplier Quality Requirements and supplier self-assessments. Know Your Counterparty ("KYC") due diligence was performed to ensure any potential new material sources met the requirements of KEMET's Supply Chain Policy. Further, KEMET's PP1 1.0: Purchasing Procedures ensured supplier validation against the Consolidated Screening List, including the U.S. Specially Designated Nationals ("SDN") list. Supplier screenings, verification, and monitoring of ultimate beneficiary owners was conducted through KEMET's third-party compliance software.
  - 2. KEMET's SQP-109 establishes procedures to identify and define Conflict-Affected and High-Risk Areas ("CAHRAs") using five criteria: Covered Country list defined by Dodd-Frank, CAHRA list issued by Conflict Minerals European Commission regulation EU 2017/821, presence of armed conflict in the specified area based on The Heidelberg Barometer, review of governance in the specified area based on Worldwide Governance Indicators, and regional human rights concerns identified by our third-party risk management software. These five criteria were reviewed and monitored during the Reporting Period, as well as KYC risk evaluation and confirmation of supplier organizational structure, social and environmental assessments, and other so-called "red flag" concerns.

#### Step 3: Design and implement a strategy to respond to identified risks.

A) KEMET reported findings of supply chain risk to senior management through quarterly Sustainability Council meetings and periodic business review meetings as appropriate to address any identified risks.

- B) The risk management plan adopted by KEMET was in accordance with the Supply Chain Policy to discontinue doing business with any supplier found to be purchasing tin, tantalum, tungsten, or gold material which directly or indirectly finances or benefits armed groups in the Covered Countries. KEMET understood the global supply chain of conflict minerals is complex and disclosure of mineral sources is often considered confidential. When potential risks were discovered, KEMET communicated with the smelter or refiner to address the potential risks.
- C) To monitor and track performance of risk management efforts, KEMET relied on supplier CMRT updates, RMI member communications regarding the status of smelters and refiners, and third-party risk monitoring software. The status of any supply chain risks were communicated internally during quarterly Sustainability Council meetings. Conflict minerals metrics were reported monthly to senior management and during periodic business review meetings as appropriate to address any identified risks.
- D) To undertake additional fact and risk assessments for risks requiring mitigation or after a change of circumstances, KEMET relied on the supplier approval status as governed by its compliance and supplier quality procedures.

Step 4: Carry out independent third-party audit of supply chain due diligence at identified points in the supply chain.

- A) KEMET relied on the RMAP independent third-party audits of smelters and refiners to supplement our internal due diligence review of conflict minerals suppliers and monitored the progress of these audits to help determine the responsible sourcing of conflict minerals in our supply chain. This includes refiners that have successfully completed a cross-recognized assessment with either the London Bullion Market Association ("LBMA") or Responsible Jewelry Council ("RJC"). As an RMI member, KEMET worked with other members to identify smelters in the supply chain and encouraged suppliers and customers to participate in the program. The data on which we relied for certain statements in this Report was obtained through our membership in the RMI, using the Conformant Facilities Lists (formerly known as RMI Conformant Smelters and Refiners List) and RMI Conformant Smelter Sourcing Information report for member ID: "KMET."
- B) The source and chain of custody for KEMET's upstream tantalum smelting operation were independently audited by Archeadvisors on January 17, 2023 and was subsequently validated in conformance with the RMAP, Tin and Tantalum Standard. KEMET's tantalum smelting operations are performed by its subsidiary, KEMET Mexico in Matamoros, Mexico. KEMET Mexico's RMAP conformance status and assessment report is publicly available on the RMI Conformant Tantalum Smelters website (found here: <a href="https://www.responsiblemineralsinitiative.org/tantalum-smelters-list/">https://www.responsiblemineralsinitiative.org/tantalum-smelters-list/</a>). The RMAP audit protocols and procedures are also available on the RMI website (found here: <a href="https://www.responsiblemineralsinitiative.org/responsible-minerals-assurance-process/">https://www.responsiblemineralsinitiative.org/responsible-minerals-assurance-process/</a>). Information contained on the RMI website or KEMET's website not referenced herein does not constitute part of this Report.

### Step 5: Report on supply chain due diligence.

KEMET's Supply Chain Policy outlining our due diligence objectives and practices, as well as KEMET's prior year conflict minerals reports have been made publicly available. Although KEMET is no longer filing a Specialized Disclosure with the U.S. SEC, KEMET will publish this Report on our website (found here: <a href="https://www.kemet.com/en/us/about/sustainability.html">https://www.kemet.com/en/us/about/sustainability.html</a>).

#### **DUE DILIGENCE DETERMINATION**

#### Summary of Due Diligence Measures Performed

KEMET's reasonable country of origin inquiry ("RCOI") and due diligence employed a combination of measures to determine whether the necessary conflict minerals in KEMET's products originated from the Covered Countries. Our due diligence measures included the following activities:

- KEMET surveyed all suppliers of raw materials which contained a conflict mineral to determine for each of the identified conflict minerals (a) the smelter or refiner where it was processed and (b) its country of origin. The survey was conducted using the RMI CMRT. KEMET accepted supplier CMRT data through March 31, 2024 for the Reporting Period.
- 2. KEMET's tantalum smelting and refining operations were audited and validated as conformant to the RMAP. In addition, KEMET sourced its downstream externally supplied tantalum material only from low-risk sources and RMAP conformant smelters.
- 3. As a member company of the RMI, we leveraged the due diligence conducted by the RMAP of smelters and refiners. Developed by the RMI, the RMAP is a voluntary initiative in which an independent third-party auditor audits smelter and refiner procurement and tolling activities and determines if the smelter or refiner implemented a due diligence system in conformance with the relevant RMAP Standard requirements.

#### Results of RCOI and Due Diligence Measures

KEMET is voluntarily disclosing the responsible sourcing status of its products to provide greater transparency. For the purposes of this Report, the status of KEMET's product categories will be identified below as "Responsibly Sourced" or "Undetermined."

KEMET's products manufactured in the Reporting Period were determined to be Responsibly Sourced if (1) all suppliers contributing necessary conflict minerals to the Responsibly Sourced products provided a CMRT identifying all smelters or refiners in their supply chain, and (2) all the identified smelters or refiners were either RMAP conformant or sourced outside the Covered Countries. Based on this definition, a review of country of origin for the identified smelters and refiners, and KEMET's due diligence process, the below product categories were Responsibly Sourced during the Reporting Period. The smelters and refiners that processed the necessary conflict minerals for the Responsibly Sourced product categories and country of origin information are identified in Table 1 hereunder.

# Responsibly Sourced:

- Ceramic Capacitors
- Electric Double-Layered Capacitors
- Tantalum Capacitors
- Aluminum Polymer Capacitors
- Tantalum Polymer Capacitors

KEMET has insufficient information from its suppliers related to the smelters and refiners that processed the necessary conflict minerals used in the manufacture of the following product categories and were identified as Undetermined during the Reporting Period. The known smelters and refiners that processed the necessary conflict minerals for the Undetermined product categories and country of origin information are identified in Table 1 hereunder.

#### Undetermined:

- Film and Paper Capacitors
- Electrical Filters

Note: In this Report, KEMET used comprehensive, top-level product categories for brevity. Certain specific products and/or product part numbers which are contained within the Undetermined product categories are Responsibly Sourced. The country of origin information is based on the RMI Conformant Smelter Sourcing Information report dated March 29, 2024.

Smelter and refiner RMAP conformance status was determined using the publicly available Conformant Facilities Lists (formerly known as RMI Conformant Smelters and Refiners List and RMI member data. A total of **145** smelter and refiner facilities were identified by our suppliers. As of December 31, 2023:

- 141 were conformant to the RMAP
- 2 were actively participating in the RMAP
- 1 was non-conformant to the RMAP

The charts below provide a summary of the RMAP status of the operational smelter and refiner facilities by conflict mineral:

Table 1 below lists the known smelter and refiner facilities that processed the necessary conflict minerals in KEMET's products:

# Table 1:

## Future Steps to Mitigate Risks

The due diligence steps previously described for both an upstream and downstream company will be used for future reporting periods to mitigate risk and improve our due diligence. KEMET will continue:

- Engaging suppliers of conflict minerals to improve the content of their responses. This includes a conflict minerals flow down clause as well as new supplier or new material conflict minerals provisions as part of our "on boarding process."
- Working through the RMI to accurately identify new or existing smelters and refiners and increase their participation in the RMAP.
- Working with the OECD and relevant trade associations to define and improve best practices.
- Responsibly sourcing our upstream materials from validated mines which utilize traceability schemes to ensure complete chain of custody and maintain our RMAP conformant status.
- Enhancing our validation process to include review of additional risks related to applicable laws and regulations.
- Including cobalt in our due diligence practices related to responsible sourcing.

By conducting these supply chain exercises during each Reporting Period in accordance with our Supply Chain Policy, KEMET will continue our efforts to mitigate risks and strengthen our company's ethical and socially responsible supply chain through effective due diligence programs.
